

TOP 3 SNORKEL TIPS

- 1** Always attach the snorkel on the left-hand side of the mask with the snorkel keeper attached over the adjustable mask straps. This is good practice for all snorkelers and prevents interference with hoses while scuba diving.
- 2** Build a Save-A-Snorkel kit including a replacement mouthpieces, backup snorkel keepers and zip ties.
- 3** Freedivers prefer to use contoured (J type) snorkels for the rigid structure that provides increased hydrodynamics while descending and ascending the water column.

SNORKEL UPGRADES

Custom Fit Mouthpiece –
Moldable material designed to mirror your natural bite and reduce jaw fatigue.

Hybrid Keeper –
Flexible silicone tube strap with a sturdy, plastic mask strap clip. Flexible silicone attachments will fit most snorkel.

DID YOU KNOW?

Snorkels were first used on the island of Crete by skin divers who collected Sea Sponges in the Mediterranean. These ancient snorkels were made from hollow reeds and allowed them to breathe while submerged.

SNORKELING INNOVATIONS

Full Face Snorkel –
Designed to cover the snorkeler's entire face, this model provides dry technology and increased field of view.

Pocket Snorkel –
Designed for professionals, travelers and confident snorkelers, this snorkel is able to fold or roll up and fit comfortably into BCD pockets.

SNORKELING

The act of swimming at or near the surface with a snorkel and mask that allow the user to breathe and see underwater while oriented facedown.

SKIN DIVING

The combination of snorkeling and shallow breath-hold diving with a snorkel and mask, typically practiced to observe marine life up close.

FREEDIVING

The act of breath-hold diving for recreation or competition to achieve challenging depths and extended bottom times.

KNOW BEFORE YOU BUY[ERS] GUIDE

Type: Contoured Snorkel (J Type)
Design: Rigid
Preferred Use: Snorkeling & Freediving
Material: Rigid Plastic
Mouthpiece: Silicone
Snorkel Clip: Plastic or Silicone
Water Removal Method: Blast Clear or Displacement Methods
Cost: \$
Features: Streamlined design for experienced snorkelers and freedivers.

Type: Classic Flex Purge Snorkel
Design: Flexible
Preferred Use: Snorkeling and Scuba
Material: Plastic and Silicone
Mouthpiece: Silicone
Snorkel Clip: Plastic or Silicone
Water Removal Method: Blast Clear
Cost: \$\$
Features: Flex design alleviates jaw fatigue, purge valve for easy water removal and replaceable mouthpiece. Options vary with manufacturer and model.

Type: Semi-Dry Snorkel
Design: Rigid or Flexible
Preferred Use: Snorkeling and Scuba
Material: Plastic and Silicone
Mouthpiece: Silicone
Snorkel Clip: Plastic or Silicone
Water Removal Method: Blast Clear or Displacement Methods
Cost: \$\$
Features: Flex design alleviates jaw fatigue, purge valve for easy water removal, splash guard to redirect splash over and replaceable mouthpiece. Options vary with manufacturer and model.

Type: Dry Snorkel
Design: Rigid or Flex
Preferred Use: Snorkeling and Scuba
Material: Plastic and Silicone
Mouthpiece: Silicone
Snorkel Clip: Plastic or Silicone
Water Removal Method: Blast Clear or Displacement Methods
Cost: \$\$\$
Features: Dry valve at top of snorkel tube to prevent flooded snorkels, purge valve for easy water removal and replaceable mouthpiece.
